

Pilulier 4.0

nextgen patient adherence tool

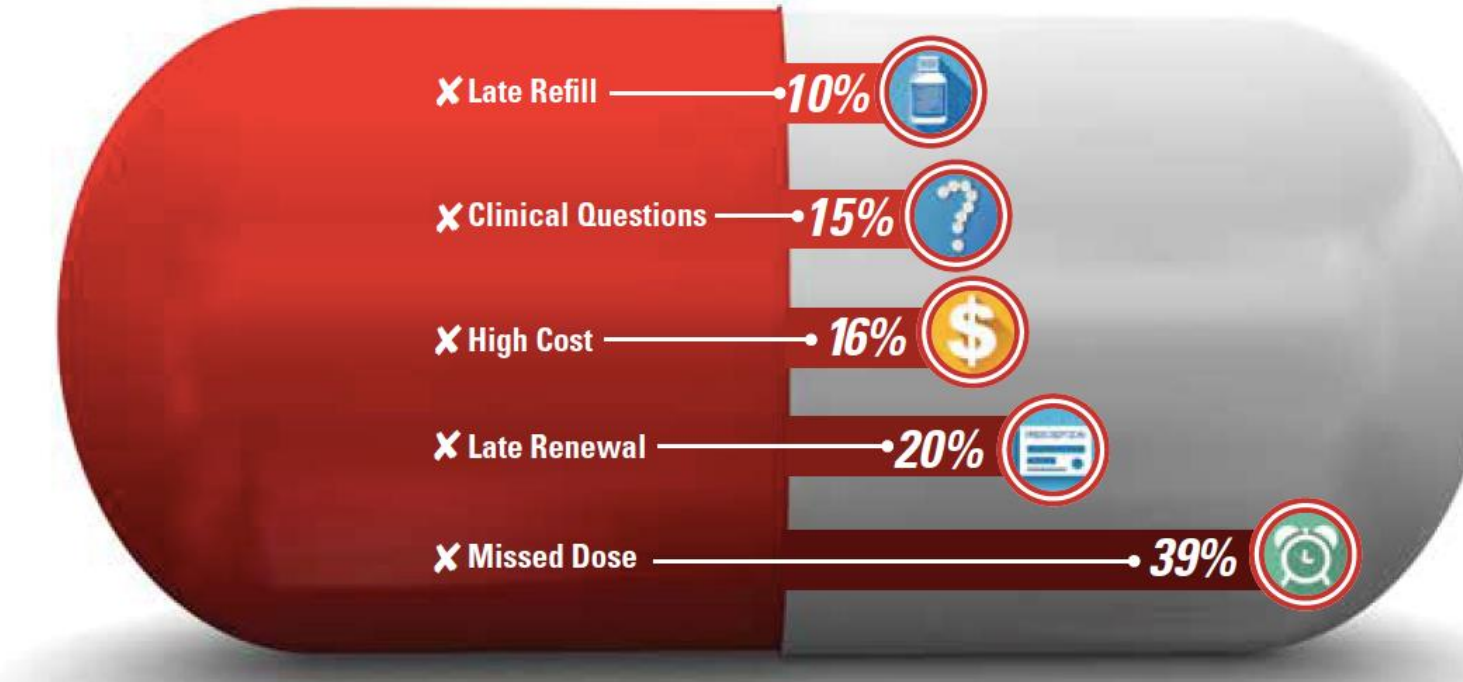

Motivation

Motivation

WHY PATIENTS DON'T TAKE THEIR MEDICINE

For many diseases, only about half the patients take their medication as prescribed.

30 TO 50% of patients do not properly follow their medication's instructions

ONLY 50% of patients take medicine as prescribed

33 TO 69% medication-related hospital administrations, are due to poor adherence

Patients should take their meds correctly

Outcome/Outlook

- see all meds
- better compliance/adherence
- more safety
- better outcomes
- notifications back to care providers
- full automatic refill process
- data for public health issues
- patient comments, adverse drug reaction info → post market surveillance

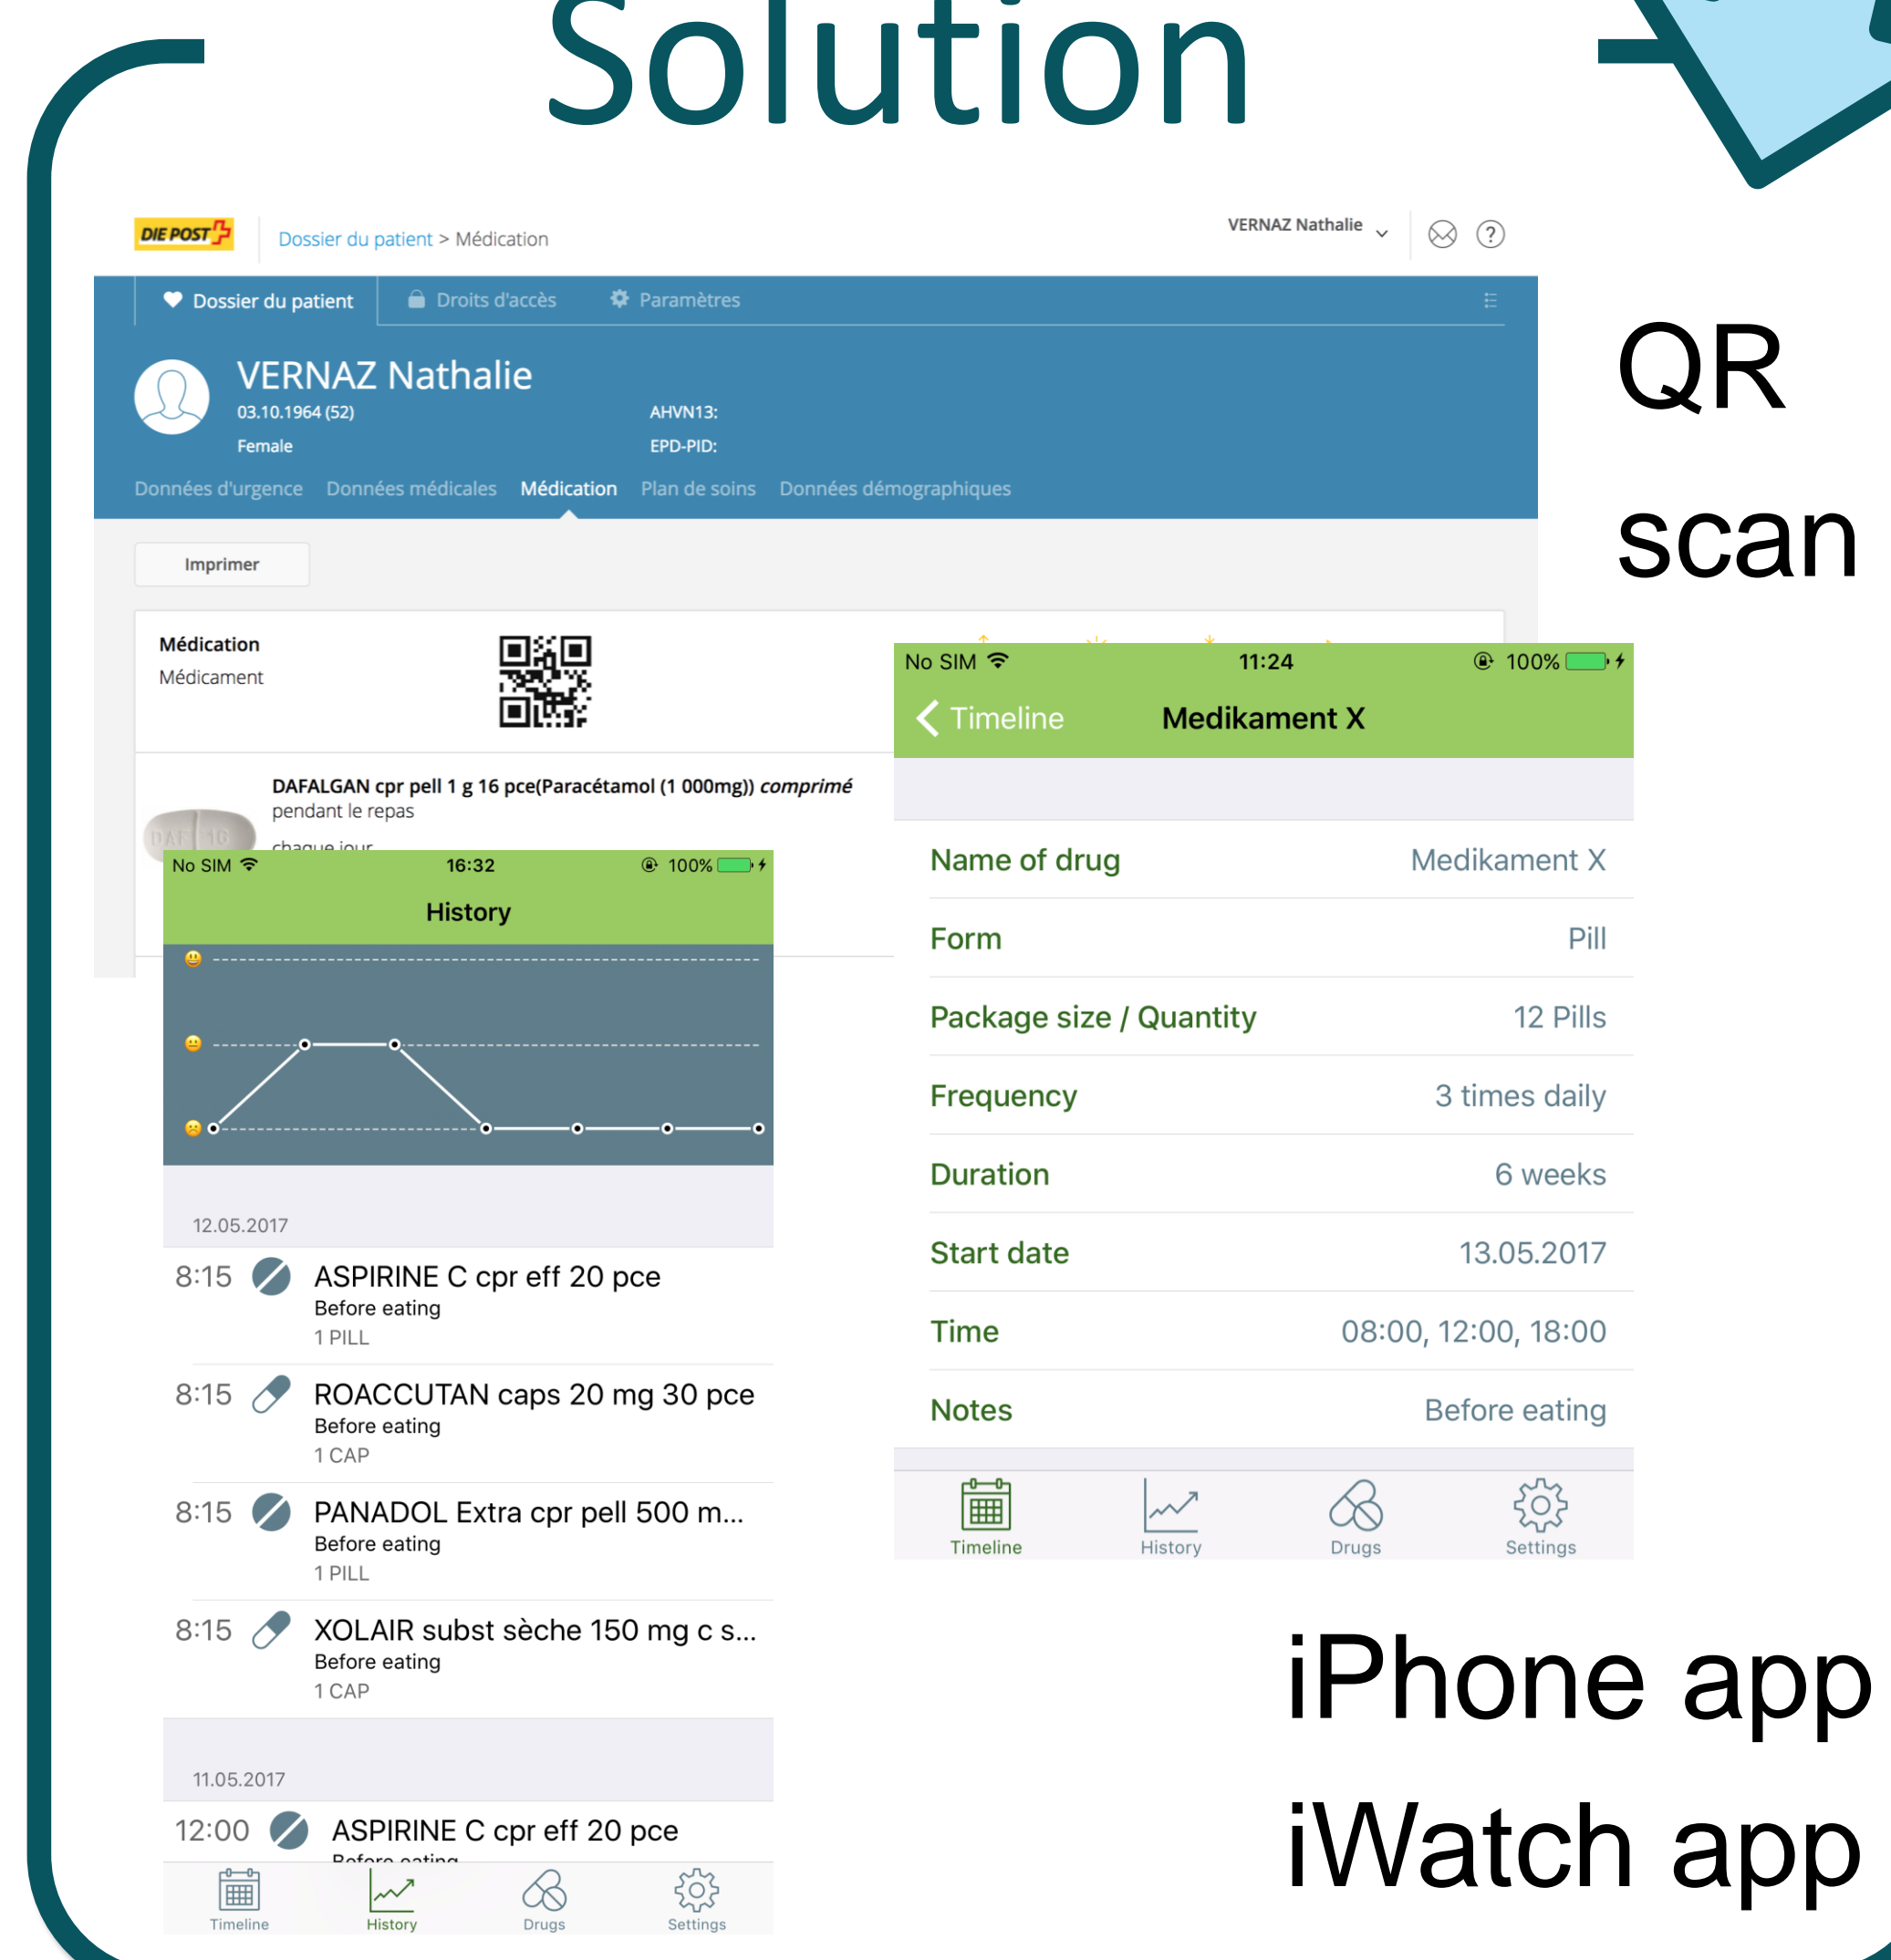

Medication Safety App

not yet another app

our app has holistic view of all meds from multiple sources
