INFORMED CONSENT

I certify that the concerned person (patient, legal representative) has received genetic counseling according to the law on human genetic analysis (LAGH) on the various aspects of the described genetic analysis in the form "patient information". This person has given its consent (in writing for prenatal, presymptomatic or family planning analyses) and had enough time to ask questions and make its decision.

Prescriptor's mandatory date and signature*:

Patient decision on storage and use of the remaining biological material and analytical data for further analyses * = mandatory

- * The patient agrees that his remaining biological material and analytical data will be stored for possible further analyses with his consent. Check "NO" means that the samples will be destroyed after analysis:
 - ☐ YES ☐ NO
- * The patient agrees with the storage and anonymous use of his samples and analytical data for improvement of the quality of genetic analysis:

☐ YES ☐ NO

Use of patient sample and his analytical data for research purposes

• In principle, the patient agrees that his biological sample and analytical data could be kept and used for research purposes: ☐ YES ☐ NO At this point, his response does not imply any consent on his part.
