

JEAN-LUC RENY, MD, PhD

Jean-Luc Reny, MD, PhD. Head of the division of general internal medicine, Geneva university hospitals (HUG), and professor of medicine at the faculty of medicine, Geneva.

After an initial training and diplomas in biochemistry in France and in the USA, Jean-Luc Reny completed his medical training with a certification in internal medicine and in vascular medicine in Paris, France. During his post-graduate training he developed his research interests in the field of atherothrombosis. He arrived in the HUG division of general internal medicine in 2009 and co-founded the Geneva Platelet Group, mainly involved in platelet function and antithrombotics with a translational approach including national and international collaborations.

Jean-Luc Reny is also actively involved in pre- and post-graduate training and in clinical research with a particular interest in diagnostic tests and clinical decision strategies in internal medicine. He is also involved in several hospital projects and various committees, as well the Swiss society of general internal medicine. He leads an enthusiastic team with a variety of top-level competencies that make the wealth of internal medicine for patients, research and teaching.
